VERSATILITY & SAFETY

multifunction device for
specialistic activities

www.gardhenbalance.it

VERSATILE & SAFE

The **multifunctional examination table** is extremely versatile and it can be used for a wide range of specialist visits. Thanks to its three sections, it is possible to adjust the position of the patient in order to ensure greater comfort during visit. Furthermore, the robust construction and solid design of the bed ensure the safety of the patient during medical manoeuvres.

3 SECTIONS

Patient's surface in 3 sections, two of them are electrically adjustable through electric actuators..

RELEASE LEVERS

Levers for manually unlocking the back sections.

CENTRAL BRAKE

Braking system with bilateral levers for the activation of the directional system.

WHEELS

Ø 150 mm swivable wheels and 5th wheel Ø 100 mm to move easily the device from place to place.

Furthermore this device was also designed for **gynecology**, it will only take to equip the device with the following accessories: Stirrups and stainless steel bowl for gynecological visits. The stirrups are extremely ergonomic and having also levers for manual and quick adjustment. The tray is made out of stainless steel. It ensures easy cleaning and disinfection, making it safe and durable over time.

MIDDLE SECTION

Electrically adjustable section to have a perfect patient's positioning.

STIRRUPS

Located on DIN bars and manually adjustable.

STAINLESS STEEL TRAY

Removable and easy to sanitize.

Standard equipment

- The lying surface is divided in 3 sections.
- Reinforced frame, made out in steel painted with epoxy paint enriched with antibacterial. The colour is customizable upon request.
- The backrest can be adjusted eletrtrically.
- The middle section can be adjusted eletrtrically.
- Motorized height adjustment through electric columns.
- Motorized Trendelenburg and reverse Trendelenburg through telescopic columns with rectangular section - Equipment code AC152.
- Quick release of the backrest, it allows to perform the cpr manoeuvre - Equipment code AC8L.
- 150 mm antistatic and swivable wheels. The directional braking system can
- be activated by bilateral pedals;
- 5a wheel diameter 100 mm which provides greater stability and improves the directionality of the device when transporting the patient from one department to another. It facilitates thrusting and driving, reducing the effort required to move.
- Centralized directional braking system made out in galvanized steel - Equipment code AC7L2G.
- Leg pads on DIN bar - Equipment code AC110/1
- Removable stainless steel tray for the collection of organic waste. - Equipment code AC155.
- Upholstery: with anti-bacterial properties, flame retardant class 1IM, antimicotic, ecologic, latex free, phtalate free. Resistant to: alchool, sodium hypochlorite max 5%, a wide range of common used detrgent, liquid and other biological fluids - Equipment code AC87/1.
- High density expanded foam mattress.
- Handset with 8 buttons for the activation of the motors.
- Equipotential node.

Do you want to change the color of the upholstery and frame?

Frame or click the QR codes and find out how to personalize the device by consulting our color cards*.

*If no preference is expressed, the device will be supplied with the available color.

Braking system

Centralized directional braking system made out in galvanized steel, it can be activated through bilateral pedals - Equipment code AC7L2G..

8 buttons handset

Couch's movements are controlled by a handset with a 3,5mtl coiled cable. The handset is user friendly and has visual pictograms useful for partially sighted person. Insulation IP66.

Stainless steel tray

The tray can be easily removed from the couch for cleaning and sanitizing, ensuring the proper safety standard to every patients. Since stainless steel is a strong and durable material, it can withstand intensive use without deteriorating or rusting.

Can be used to collect liquids, waste and other materials during gynecological procedures
- Equipment Code AC155.

Middle section

The electrically adjustable mid-section allows the nursing staff to adjust the patient's position for a better view and easier access to the area of interest. This can also be extremely useful for inspection and biopsy procedures where clear view and easy access are essential.
