

# Ring Positioner

**SINGLE USE  
POSITIONER**

## **Frequent use**

Surgery

Emergency room

Intensive care unit

Birthing room

**PRESSURE REDUCTION  
AREA SCHEME**

An important phase of any surgery is the accommodation of the patient on the operating table. In fact correct positioning reduces the risk of ulcer formation, pressure sores and nerve injuries during the operation.

Furthermore, the patient who goes through local or total anesthesia gradually loses consciousness, motor skills or at least sensitivity to touch and pain. He is therefore unable to perceive and react to potentially harmful external stimuli related to the position in which he is placed on the operating table or caused involuntarily and unknowingly by the health and social care staff: friction, rubbing, excessive and prolonged pressure, shocks, burns.

Therefore it is advisable to choose appropriate positioning devices that ensure correct pressure distribution and maintain the patient in the proper position throughout the intervention.

Reliable, efficient and not much expensive, the positioners are specially designed tools to prevent the onset of injuries and to relieve and stabilize any injuries already present in the patient undergoing surgery.

The ring positioner is designed to accommodate the patient's head by providing neck support in a supine position.

The colour of the foam used is subject to availability.

## Benefits

- Effectiveness to prevent abrasions;
- Effectiveness in preventing friction burns;
- Effectiveness to prevent decubitus wounds;
- Ensures air circulation;
- Ergonomic design.

## Features

- Polyurethan foam;
- 100% latex free;
- Non-sterile;
- Single-use.

## Dimensions

ID Product	Dimensions
GB.0003PUM01	Diam 8 x H 6 cm
GB.0003PUM02	Diam 10 x H 6cm
GB.0003PUM03	Diam 15 x H 6 cm
GB.0003PUM04	Diam 18 x H 6 cm
GB.0003PUM05	Diam 23 x H 6 cm

## Scheda tecnica

GMDN Code	<b>41058</b>
Basic UDI-DI	<b>805771740POSPU</b>
Intended use	Upholstered cushion
Manufacturer	GARDHEN BILANCE SRL
Class	Class I
